- Other custom-order products.

Dedicated to manufacturing quality assured products at competitive prices on a timely basis, we are equipped to produce 50,000 meters of printed & another 50,000 meters of white/dyed fabric per day. We can supply termite resistant, fire retardant, anti-allergic & customer finished to fabrics.

ARC's manufacturing facilities consist of a brand new dyeing & printing mill that operates:

- 2004 Model Zimmer Rotary Printing Machine. (16 Colors)
- 2004 Model Osthoff Singeing Machine.
- 2004 Model Monforts Stenters with double Mahlo System.
- 2004 Model CST Ink-Jet Engraving System.

## Singeing

## Peeling

"ARC" operates the latest Osthoff-Singeing machine, which is equipped with patented Double-Jet Burner technology. The ideal gas & air mixture distribution is achieved with a series of expansion & compression chambers. An unbroken flame jet at the exit of the mixture from the two parallel slots & the controlled combustion within the chambers of moulded ceramic bricks provide Singeing to Perfection. To save energy, the flame width can be set in accordance with fabric width, either manually or automatically.

# Finishing

## The straightening of Textile weft courses

Our textile finishing unit is equipped with latest Stenters range of "Monforts" in 320cm width. The Stenters are designed with 08 dyeing chambers & a couple of mahlo-systems to straighten the fabrics wefts.

Setting is being performed on the newly erected "Monfort Montex-5000" stenter.

We embrace our customer values with regular finishes to special finishes of Anti-Mites, Flame-Retardant, Water-Repellent, Easy-Care, Wrinkle-Free, down-Proof & others.....

Our digitally controlled machines facilitate us to integrate our skills with future.

## The Digital Creation

Our dedicated & highly skilled creative team performs in a fully computerized digital studio. The creative team works in this modern & highly sophisticated environment to offer the finest designs for our customers.

The highly skilled engraving team takes extra ordinary care with each design. They use latest CST CAD-CAM system from Germany to produce designs for final prints.

# Rotary Printing

## The Colorful Future

State-of-the-art Zimmer Rotary Printing Machine with 16 colors & 320cm width enables us for precision & accurate prints on a variety of fabrics. Fully computerized Rotary Strike-off Printing Machine by Zimmer-Austria ensure our best interaction with our customers by providing them delightful & registered Strike-off samples. "ARC" invests in its equipment & personnel to exceed its customer's expectations.

## Curing & Calendering

### The Final Touch

We fix our print impression on the fabric with heat treatments of fully automatic curing machine.

We finalize the fabric textures by Universal Calendaring machine.

We produce sild like soft, snow like filled & a range of novelty finishes.

## Stitching

The company stitching department is equipped with modern stitching machines. We are using renowned brands - "Juki" & "Pegasus". The machinery is operated by well experienced & skilled staff. We always stitch our fabrics "in-time" to deliver our quality products "on-time" to our valued customers.

# Laboratory

## The generating of quality & variety with excellence

Our rapid growth can be attributed to our sensitivity to quality control. Each order is checked by implementing physical & Chemical testing in our international standard laboratory. The in-line & final test & inspection by our quality department leads us to the entire satisfaction of our valued customers.
