### LAB

#### INTRODUCTION

By taking into account for the realization of quality of products, the management of company has established a well-furnished equipment lab, & for this purpose a contract was signed between James Heal, UK, and Nizamsons (Pvt.) Ltd for the induction of modern equipment, & company has imported sophisticated equipment from the said company for the evaluation of its products, as per fastness, bleeding, strength & performance requirements to meet the customer expectations. A team of expert from James Heal regularly visits & calibrate the equipment to check the correctness & validity of results. Lab also maintains internal checks to ensure the accuracy of equipment & results/analysis. Lab participates in Interlaboratory Comparisons & proficiency testing to ensure the quality of its testing.

First Testing Lab, which is a division of Nizamsons (Pvt.) Ltd, is committed to provide quality services to its customer with relevant production requirement and technically valid results for Physical testing of Textile/Fabrics/Woven/Knitted products of PPE & Casual Garments. The Lab management and higher management is working continuously to meet the customer expectations, to improve quality of products and applicable quality requirements in compliance with ISO/IEC 17025.

FTL has been established to improve the quality of company's products, and lab follows international/national legal & regulatory requirements with an aim to enhance customer satisfaction through the effective application of the testing system, including processes for continual improvement of the production system & the assurance of the conformity to customer and applicable statutory & regulatory requirements. For this purpose company has submitted a comprehensive scope to achieve accreditation milestone for its international recognition in standards & quality improvement.

## GLOBAL EXHIBITIONS

Nizam Son's marketing philosophy is embedded in big trade fairs, arranged across the world, to cope up latest trends of the consumers' markets. This helps us to understand the market cultures of several countries across the world, indeed. Our marketing exhibitions in multiple countries urge us to keep on monitoring the new product trends, which reciprocally persuades the power of research and development in Nizam Sons to produce distinct designs, materials, techniques and patterns to position itself ahead in the market competition. Since 1999, Nizam Sons has attended several trade shows worldwide among which Ispo (Germany), A+A (Germany), Magic Show (USA), National Safety Council Show (USA), Expo Protection (France), Intersec Expo (Dubai) and Safety show (Australia) are the repetitive events.
