National Logistics Corporation

Estd 1978

## **Transport Anything Anywhere Anytime !**

### **About NLC**

Established in 1978, the National Logistics Corporation today is Pakistan's leading public sector corporate entity providing unparalleled services in multimodal logistics, cross-border transportation under TIR, engineering and construction, border terminal management, education, human development, technology and much more.

NLC Logistics Services carry out the largest cargo operations in Pakistan by employing multiple modes of transportation to provide end-to-end solutions to its valued clients. The elaborate infrastructure, extensive footprint and fleet of modern vehicles complemented by a trained and experienced workforce accords NLC the exclusive ability to transport variety of cargo to over 100 destinations across Pakistan.

NLC Logistics Services comprise Road Freight, NLC Express Freight Train (NEFT), Marine & Air Services, Dry Ports and Logistics Parks.

NLC is the only organisation in Pakistan that has a modern and diversified fleet, fully compliant with the standards of Oil and Gas Regulatory Authority (OGRA) and National Highway Authority (NHA), Crude Oil Sale Agreement (COSA) and Health, Safety & Environment (HSE) in dry and liquid cargo transportation.

# NLC Multimodal Logistics Services

Import-Export-Transit  
Air, Sea, Land & Rail

## Air & Sea Freight

- Dedicated NLC helicopter & air services (Karachi – Dalbandin)

### Infra Construction Services

NLC construction capabilities:

- Site/camp
- Earthwork & road infrastructure
- Residential complex
- Construction of warehousing & storage facility on site.

## Border Terminals

Pakistan's unique geographic location places it right on the confluence of traditional trade routes. In February 2005, the Government of Pakistan assigned NLC to set up border terminals to ensure effective border management for regional trade. The border terminals aim at facilitating trade through these trade routes. Border Terminals act as hub of import/export activities where all relevant government departments like Customs, Immigration, Federal Investigation Agency (FIA), National Database and Registration Authority (NADRA) and Anti-Narcotics Force (ANF) carry out their respective responsibilities under overall management of NLC. The border terminals indeed serve as trade facilitation centers and are contributing great deal towards boosting of regional trade.

## NLC Engineers

NLC Engineers is one of the most credible name in the construction sector of Pakistan. With over four decades of experience, the history of NLC Engineers is replete with innumerable instances of successfully completing complex engineering projects across Pakistan. It has made significant contributions towards the infrastructure development of Pakistan by completing scores of projects including construction of highways & motorways, mega concrete structures like flyovers, underpasses, bridges, building works, railway tracks, metro bus services, high-rise buildings, dams and rehabilitation works in disaster hit areas. NLC Engineers has so far completed 249 projects while over 98 mega projects are presently in progress (as of October 2023).

# Customs Clearance Facilitation Services

Nationwide Customs clearance  
agency license for Seaport,  
Airport and Dry Port
