

FATIMA TOWEL INDUSTRIES established since 2010, corporate head office and factory is located in Sindh Industrial Trade Estate Super highway, Phase-1, Karachi, Pakistan.

The Company manufactures and export terry towels and terry product throughout the global market. The company principal markets include United States, Canada, European Union, United Kingdom, Australia and United Arab Emirates. Primarily being an exporter of towels, we gradually diversified our product line by entering into the institutional as well as the Retail end of the business.

Throughout our 14 years of experience, we have only focused on continuous improvement of our services by showing dedication, devotion and working effortlessly to satisfy our customer's needs.

Our company seeks a high standard of performance and aims to maintain long-term relationship with customer and provide quality products with modern manufacturing facility for the purpose of our valued customers satisfaction.

Our company acknowledges that commercial success and sustained profitable growth depends on the sourcing, development and retention of its talented human resources. It will continue to invest in building its organizational capacity and capability.

We aim to deliver quality products and thus all our quality control and R&D is done in house.

All our products are made from quality yarn, and maintain quality control, in weaving, dyeing processing, and stitching. In every stage of manufacturing, stringent quality control measures are taken. Our interlining quality is well comparable with other well known international Companies. A dedicated team follows each production order from development until shipment. Our unique system and strict documentation prevents undesired delays shipments. We believe in transparency and therefore update both customer on our analysis of production time lines.

All QC inspections and audits are customized and conducted according to customer specifications. From yarn specialists to stitching experts. Our inspection team has individuals who are continuously involved in the quality monitoring.

With the advent of fast vessels, the importance of correct documentation cannot be overemphasized. There is a dedicated staff that does strict scrutiny of all shipping documents before they are forwarded to the customers.
