TEXTILE MILLS (PVT) LTD

A Part of **PAK AGRO**

# *Who we are*

Laiq Rehman Textile Mills, founded in 2021 to produce high quality international standard terry towels at a competitive price to satisfy our overseas customers, mainly in US and Europe.

The in-house production facilities are equipped with state-of-the-art European and Japanese machinery, having a production capacity of 22,000 pounds per day.

# *CEO Message*

As the CEO of Laiq Rehman Textile Mills (Pvt) Ltd, I am delighted to welcome our customers with a vision to excel in delivering value as an innovative and dynamic textile company.

We are a manufacturer with global export aspirations for our premium terry towels and home textile products. We possess a qualified and skilled management team that has a strong commitment to become a vertically integrated textile company.

We ensure the satisfaction of our customers by providing best quality products and services at most affordable prices. The company also places the weight on the satisfaction of our valued workforce without whom the goals are unachieved.

I am proud of the management and production teams for their pursuit of excellence and for putting forth their best efforts to ensure the company's long term success.

*Laiq Ahmed*  
CEO,  
Laiq Rehman Textile Mills

A stack of five folded green towels is placed on a white, ribbed pedestal. The towels are neatly folded and stacked on top of each other. The background is a blurred wooden wall.

## *Our Mission*

Our Ambition is to be the world's most dynamic and leading textiles manufacturing company.

## *Our Vision*

Our vision is to be the number one value added environmental friendly textile exporter.

The background image is a composite of two photographs from a textile factory. The left side shows a large industrial machine with a prominent blue gear and various mechanical components. The right side shows a close-up of a large, complex metal machine, possibly a loom or a part of a textile processing line, with various pipes, valves, and a control panel. A red semi-transparent rectangle is overlaid in the center, containing white text and a bulleted list.

We follow international standards throughout the entire production process, using modern European and Japanese machinery operated by highly skilled staff.

- **WARPING & SIZING**
- **WEAVING**
- **WET PROCESSING**
- **CUTTING & STITCHING**
- **INSPECTION & PACKING**

Our professionals combine yarns from different cones to form a sheet while preserving yarn elongation and maintaining uniformity. The goal is to create yarns wrapped on a flanged barrel to maintain the density of yarn mass within a given tolerance level.

The extensive weaving unit of air jet looms allow us to produce fabric in different weaves, densities, and widths. The fabric is then customized according to our client's requirements, allowing us to work with different yarn compositions and densities. We take pride in having a strong grip on air jet weaving looms.

Our highly skilled team ensures that every product meets international standards of weaving, dyeing and stitching. Thus, the team meticulously reviews and controls the product size, weight, design, and pile height as per the customer's requirements. We only use the best quality dyes and chemicals and start with patch testing for the permanent coloring of products.

Laboratory  
with  
latest  
Equipments.

## *Quality Control Ensured*

We are certified with the international requirements of BSCI.

Our products are tested for harmful substances and are certified for human-ecological requirements according to Oeko-Tex Standard.

- **Reduced Chemical Impact**
- **Condense Material Wastage**
