QASIMI
INDUSTRIES (PVT) LIMITED

Qasimi Industries (Pvt) Ltd is a leading enterprise that has earned its reputation among the international and domestic buyers by producing high quality synthetic fabric. The company was established in 1994 and within the span of three decades its products gradually won the major market share and gained unprecedented success by becoming the top choice for its customers. Today, our company is at the crest of the wave in business due to its high-tech production facility. The plant is equipped with most modern weaving machines, twister machines, and a sizing and warping department. We can produce fabric upto 220cm with upto 200 GSM fabric.

When you choose our polyester fabrics, you're not just choosing a textile - you're choosing innovation, precision, and a touch of artistry. Whether it's for fashion, interiors, or industrial applications, our fabrics are a testament to our dedication to excellence. Experience the fusion of tradition and technology, creativity and precision, at our two state-of-the-art factories - where polyester comes to life in ways you've never imagined.

Silky Line

Crepe

Crepe fabrics are without a doubt, some of the most popular fabrics in the world. They are characterized by their wavy, crinkled texture, which gives them a unique and elegant appearance. The fabric has a soft feel and drapes well.

Captivating Crinkle Fabric

Our Products Fabrics

Abaya Fabric Unveiling Elegance Premium Nida Abaya Fabric for Global Export – Elevate Modesty and Style with our Exquisite Collection Chiffon fabric can easily be dyed in contrast to any desired color shade and used for bridal gowns and also appears in evening dresses, prom dresses, and scarves.

Chiffon refers to a light plain weaved sheer fabric with a soft drape of alternate Sand Z-twist crepe yarns. The twist in the crepe yarns puckers the fabric slightly in both directions after weaving, giving it some stretch and a slightly rough feel. These fabrics when held up to the light, strongly resembles closely woven netting.

Chiffon fabric can easily be dyed in contrast to any desired color shade and used for bridal gowns and also appears in evening dresses, prom dresses, and scarves.

Crepe Fabrics are without prominent weave effects but have a crinkled or pebble surface. It may be manufactured in the range of light to medium weight. The fabric has silk-like texture and drapes well. It is used for making dresses, blouses, linings, scarves and in home furnishings too.
