- Total: \$ 800
- Land: 150
- Equip: 600
- Labor: 1000

Hydroponics is a highly efficient and controlled method of growing plants without soil. It allows for year-round production, water conservation, and reduced pest and disease risk. The initial investment is high, but the long-term benefits of consistent yields and lower operational costs make it a viable business model.

INDUSTRY

The manufacturing industry in India has been growing rapidly, driven by government policies, infrastructure development, and a skilled workforce. The industry is a key contributor to the country's economic growth and provides employment opportunities for millions of people. The manufacturing sector is diverse, ranging from traditional handicrafts to modern high-tech industries. The industry is also facing challenges such as global competition, technological changes, and environmental concerns. The government is implementing various policies to support the growth of the manufacturing industry and create a favorable business environment.
