Supply Chain Services

Head Office and Production Facilities

We have extensive production facilities and expertise in Pakistan.

Among our many key strengths we are particularly proud of our flexibility and speed to market. An invaluable competitive advantage in our fast moving industry.

We firmly uphold the reputation of our customers, business partners and our own organisation by ensuring all our factories work with transparency and full ethical and social compliance.

A full focus on customer satisfaction, directing and managing development from start to finish. Our merchandisers are committed to understanding our customers products and objectives, becoming brand guardians and adding real value to the production process.

Pakistan is the 4th largest producer of cotton in the world, and the 3rd for yarn production. This coupled with duty free exports to the UK and Europe, make Pakistan the ideal production centre for the fashion and textile industry.

Our Mission

We Source Solutions

- To provide the most innovative design and product development services fully tailored to each brand and retailers' specific requirements
- To share invaluable design and marketing intelligence resources
- To fully embrace and deliver transparent ethical sourcing and social compliance
- To focus on sustainability and innovation to protect our natural environment, human welfare and ecological health
- 95% of the raw materials used in the supply chain are locally sourced

System Certifications:

Product Certifications:

Sourcing Solutions is committed to improving our green footprint. We currently use recycled cotton in our products and always work to introduce new, greener and more sustainable processes throughout our supply chain.

Social Certifications / Reports:

We have a dedicated Ethical and Compliance Team based in our Head Office in Lahore and Karachi, which manages all auditing requirements for each of our customers.

They respect and value safety and security, labour welfare and regular improvement of working conditions.

Quality assurance is key to our business. We have strict quality inspections at every stage of the production process, and these are consistently followed and updated to ensure our customers get the best. Attention to detail, quality and safety is a top priority.

To achieve our goals, we continually review and refine our processes and methods. All our products are tested from customer nominated accredited testing houses. Our factories are regularly updated and monitored on any new rules and regulations.
