FASHION FOR YOUR HOME

Product Catalogue

Bast by Flaire'

Bast is a green fibre which acts naturally as an insulator and provides moisture control. Its applications are multifold. We also offer unique advance processes on our fabric & for our product line :

100% Bast Fabric, Bleached & Dyed to any color.
Blended fabric with Bast and other natural yarns (Hand Made)

Processes can be obtained either independently or also in combination with, for specific needs and relative industry requirements. All modern processes such as softened , fire retardant, stain repellent including anti-bacterial, can be conducted on the fabric as needed.

Journey

AHZ Enterprises is an independent company based in Pakistan, committed to the production of Green, Eco- Friendly, Natural fiber using Bast and Cotton to develop home textiles and fabrics.

The portfolio of Flaire' contains the entire spectrum of products today made from Bast – from fiber to fabric and allowing us to put together almost the entire value-added home textile product range, for the retail sector offering a complete new material with natural benefits

For centuries, Bast has been traditionally used for the manufacturing of packaging materials such as sack-cloth, ropes, yarns, carpet backs & woven materials. Today, Flaire' offers a variety of sustainable, bio-degradable, innovative new Bast fabrics & products at competitive prices, for your home & style.

AHZ Enterprises is the only Organization in Pakistan which is working on the Bast yarn & fabric with an objective to reduce, reuse & recycle (3R), using this natural fiber.

Years of research with the assistance of European companies, has made our hand - made & woven fabrics not only durable & reliable it has also ensured that the handmade fabric meets Global standards of acceptability and finesse

Our Concerns:

In future, the use of natural fibers like Bast will increase, facilitating healthy living, replacing synthetic materials, due to the competitiveness offered by natural fibers like non-itchy, health benefits like breathable & hygroscopic behaviour.

Bast and natural fibres provide the solution to temperature differences by giving relief of around (10 to 15) degrees Celsius when used in curtains or as wall paper and like comparable products.

Natural fibers such as Bast will provide competitive advantages over artificial materials for industrial, agriculture and other applications especially in household use by contributing to Energy conservation and better indoor environmental quality, when speaking in terms of the Green Buildings concept with an added plus as to, Innovation.

Contribution

We are protecting the Global environment by promoting the use of natural Bast fiber jute which is durable, sustainable, eco - friendly and biodegradable.

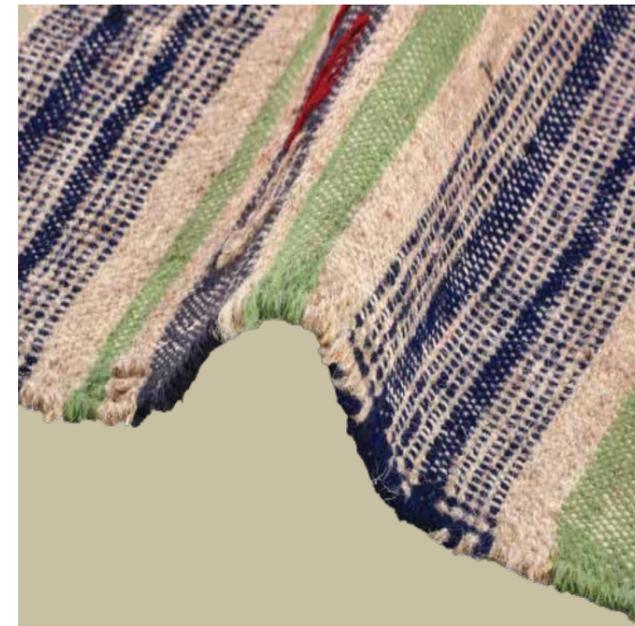

We permanently extend our technical knowledge and aim to obtain the highest possible degree of expertise in our area of activity.

We are continuously exploring possibilities to the use of natural fiber and yarn development by venturing into new horizons, in the textile World with inclusion and fusion of other natural fibers to create fabrics & products to meet World class industrial precision. Today, we can do any form of print and produce any design whether it is digitally printed or other to meet requirements for all.

Mission

To become fabric and product leaders by combining Bast with other materials, through advanced modern research, development, innovation, design and promoting these natural, eco - friendly materials Worldwide. with sustainability

Hand Made Rug

This **GREEN ECO-FRIENDLY** Rug has been

Made at **THAR** desert on sustainability model by the local artisans

who have been trained by AHZ ENTERPRISES (PRIVATE) LIMITED,
