OUR POLICIES

Quality is one of the prime concerned aspects of our organization. To maintain high standards, in our products and processes, we have implemented strict quality control measures at each stage right from procurement till final delivery. This helps us in ensuring delivery of defect free range that is also in compliance with chemical industry standards. Further, our quality controllers conduct various checks and tests on the range prior to its dispatch so that clients receive value to their money.

Quality Management

Our ambitious & talented development engineers are constantly striving to improve existing solutions in terms of dyeing and finishing, ease of application and economic efficiency. No wonder we are counted as best when it comes to product innovation.

Quality Manpower

Besides stringent quality control measure and quality "Checks" at all critical processing stages, we regularly educate and motivate our employees & labour to understand our company's quality objectives and work together with them to achieve the same.

Our all dyeing material is tested at source in our lab for specific qualities like Color Fastness, Shrinkage, Strength etc, as per National and International Standards or as per buyers specifications and requirements. We believe that Success is not an overnight result but an achievement of consistent efforts of understanding and providing the best to the customers through improvement, quality and service

Quality Testing

Our customers better know our quality services as all our dyes are safe, durable, environment friendly & color fast. We believe in 100% customer satisfaction and we do not compromise on any aspect of quality. Our company believes in values of honesty & customer satisfaction, We also have an in-house laboratory and quality department to check & alter the products in tune with customer specifications and samples.

QUALITY TESTING MACHINES
